» **Eastern Europe faced with the crises of the system**

by Catherine Samary

The "European construction" (associated with the redefinition of continental relationships after the fall of the Berlin Wall) aroused popular aspirations, which were radically opposed to the current situation: aspirations for a continent that would resist antisocial policies while remaining open to the world, according to a democratic, social, ecological and solidarity-based logic... This was in particular what was hoped for in Eastern Europe, where the populations aimed for greater freedom and (...) [\[Read more\]](#)

With dictator Ben Ali ousted from power since 14 January 2011, Tunisia bears the burden of a public external debt amounting to \$14.4 bn, which is a major obstacle to the development of the Tunisian people since repayment (capital plus interests) drains on an average an annual sum 6 times larger than the health budget. While Tunisia urgently needs all its financial resources to face the current situation, the present governor of the central bank of Tunisia is considering devoting EU 577 (...) [\[Read more\]](#)

NO more Chernobyl, NO Fukushima

» **Disaster - earthquake and nuclear explosion**

by Yoko Akimoto

Sadly, as time passes on, the reality is waking us. We see new figures whenever we switch on TV, which may be, I feel, the same as our friends in Pakistan or Haiti who are still being suffered by natural disaster. Yesterday the governor of Miyagi announced that the count of bodies would amount to over 10,000. And today the No.3 reactor at Fukushima Nuclear Power Plant has exploded, and now (2 am on the 15th, in local time) core melting is happening at the No.2 reactor. It is quite clear (...) Meanwhile, we find (...) [\[Read more\]](#)

BOOK

» **Debt, the IMF, and the World Bank: Sixty Questions, Sixty Answers**

by Éric Toussaint and Damien Millet

Mainstream economists tell us that developing countries will replicate the economic achievements of the rich countries if they implement the correct "free-market" policies. But scholars and activists Toussaint and Millet demonstrate that this is patently false. Drawing on a wealth of detailed evidence, they explain how developed economies have systematically and deliberately exploited the less-developed economies by forcing them into unequal trade and political relationships. Integral to this arrangement are the international economic institutions ostensibly created to safeguard the stability of the global economy—the International Monetary Fund (IMF) and the World Bank—and the imposition of massive foreign debt on poor countries. The authors explain in simple language, and ample use of

graphics, the multiple contours of this exploitative system, its history, and how it continues to function in the present day. Ultimately, Toussaint and Millet advocate cancellation of all foreign debt for developing countries and provide arguments from a number of perspectives—legal, economic, moral. Presented in an accessible and easily-referenced question and answer format, *Debt, the IMF, and the World Bank* is an essential tool for the global justice movement (...) [\[Read more\]](#)
